![SWARRNIM SCHOOL OF DESIGN]

The idea of Institute of Designs is to bring forward the entrepreneurship capabilities and to facilitate students to create design aptitude for a more socially responsible and sustainable environments. School of Design focuses on & design thinking & which leads to innovation, which are not only multidisciplinary but also multidimensional through systems and frameworks approach. The curriculum enables future designers to deliver with a rational knowledge imparted which strengthens the design attitude as well as aptitude. It educates students in the latest tools, techniques, and state of the art design developments in the field.We at School of Design have a passionate belief that the discipline - in its many forms - Architecture, Interior Design, Graphic Design and Animation, Fashion Design and Product Design, is both complex and constantly moving forward. New designers have to be better equipped to meet future challenges, facilitating a problem-solving design consciousness that links learning with actual experience and encourages that the designer could be a bridge between traditional and modern realities.

Programme Highlights
